

# Pet Adoption Website

## Overview

Briefly describe your project and its purpose.

## Prerequisites

Ensure you have the following installed on your system:

- [Node.js](#) (which includes npm)
- Express(install via npm)

## Running the Application

To run the website, follow these steps:

1. Open a terminal and navigate to the project directory if you haven't already:

```
cd your-project-directory
```

2. Make sure Node.js is installed. You can verify the installation by running:

```
node -v
```

3. Start the server:

```
node server.js
```

4. Open your web browser and navigate to:

```
http://localhost:3000
```

The website should now be running on `localhost:3000`.
